- 4-6 Week Turn Arounds
- Completely Custom From The Ground Up

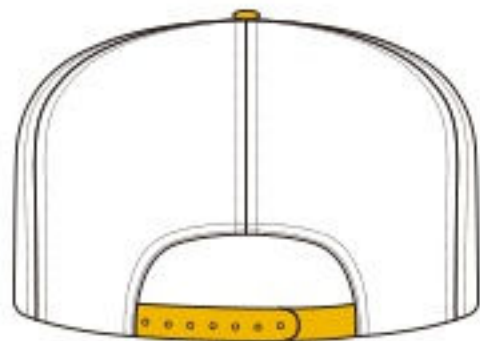

Crown

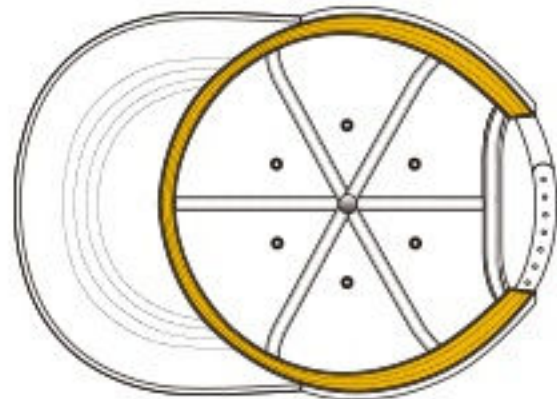

Bill

Top button

Back closure

Sweatband

## Crown

The front part of the hat fits over the top of your head and touches your forehead. Usually the main area of embroidery and customization on caps. Can be created as low profile, medium profile or high profile by adjusting the angle of the front crown. Low profile slants backward versus high profile that angles almost straight up the front crown.

The crown of the cap is also what determines if the hat is structured or unstructured. Structured hats have a buckram fused to the inside of the cap to keep the front ridged. Unstructured caps has no re-enforcement and cap material sits loose against the head.

## Top button

Fabric covered button that sits directly on the top center of the hat at the intersection of the fabric panels. Button color can match the material of the cap or in a contrasting color.

## Eyelets

Round holes sewn in the hat for increased ventilation and style. Eyelets can have sewn borders or metal grommets.

## Panels

Fabric pieces used to create the shape of the cap. Most are 6 panels caps with a seam in the center of the front crown but there are also 5 panels and 8 panels caps. 5 panels caps are mainly used for the trucker caps or caps that have screen printing on the front instead of embroidery.

Panels are sewn together with thread matching the color of the cap material or made thicker if needed. Other fabric types are wool, mesh or performance materials that allow for greater moisture wicking or ventilation.

## Bill or brim

The visor that extends out from the crown of the cap to shade you from the sun or elements.

The bill is normally curved or can be flat as in pro-style caps. Bill is plastic and sandwiched between two pieces of fabric. A contrasting sandwich is created by adding a third piece of fabric along the front of the bill between the top and the bottom fabric. Sandwich fabric is normally in a contrasting color and can be screen printed with text for customization.

Flip style bill is when a contrasting color of fabric is used on the bottom of the bill and is folded up over just the front of the bill to look similar to a sandwich style bill. Stitching on the bill can range from 4 rows to 8 rows. Length of bill varies between styles.

## Back closures

On adjustable caps, there are a variety of closures used. Most popular are velcro, sliding buckle, deluxe locking brass buckle or plastic snap (used on trucker caps most often). Fitted style and

Flex style hats have no closure style on the back nor do they have the hole in the back.

## Sweatband

Fabric used on the inside edge of the cap to help absorb sweat and keep your cap looking clean and dry. Sweatband styles range from standard cotton to high performance synthetic material with advanced moisture wicking properties.

In this catalog we will walk you through the hat-making process.

Start by selecting your style and move on down the list. If you get stuck along the way, we would be happy to answer any questions you may have.

---

### 1. Style

The style of the hat generally determined by the number of panels it has or the shape of the crown. Each style has a specific look and feel based on how the hat is assembled.

### 2. Structure

The structure of the hat will determine the flexibility and shape profile. Choose between structured crown and an unstructured crown.

### 3. Visor Shape

Choose between a rounded or squared bill shape. Then select a curled bill or a flat bill structure.

### 4. Fabric

Our custom hats can be made from many different fabrics and blends. Select the materials that best fit your style and design, or create your own pattern or print.

### 5. Color

Pick the color(s) for the the crown and the visor

### 6. Labeling

Customize your hat with your personal branding or artwork. Choose from any of our standard branding options and get creative with your design.

### 7. Closure

Select a closure. Match the style and color to your branding.

# SELECT YOUR FABRIC

Choose from our premium fabric library to give your custom hat the perfect look and feel.  
Available color options by fabric type.

Don't see what you're looking for?  
Let us know, as we are always  
adding new materials.

## Cotton

Sweat-absorbing, breathable, soft, anti-sensitive, easy to clean

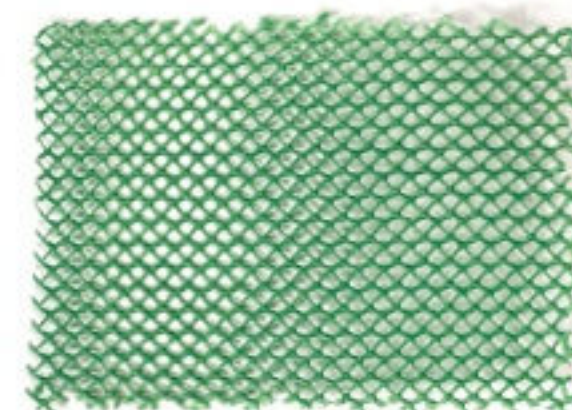

## Acrylic

Hats made of this material are inexpensive. Acrylic head wear keeps its shape, holds its color, and is resistant to stains and wrinkles.

## Corduroy

Corduroy round plump, wear-resistant nap, thick texture, soft feel, good warmth. Corduroy fabric should not be ironed, collection should not be heavy,

## Nylon mesh

Synthetic fibers, comes in a variety of weights and colors. Firm or soft mesh can be used for back panels, breathable and cool for summer.

## Suede

Suede is a soft leather with a napped exterior surface, kind air permeability and fine hydroscopicity have.

## Cotton canvas

Easy to wear and wash, no ball, not easy to generate static electricity, moisture absorption, high color fastness

## Microfiber

Hygroscopic, breathable, waterproof and silky in appearance and style, the fabric is soft, shiny and smooth to the touch.

## Eye-bird mesh

The fabric is light in quality, easy to wash, especially dirt resistant, functional fabric, sweat absorbing and breathable

## Melton

Melton wool is thick and ideal for cold weather, with dense and quasi-felted texture. Well fulled and a felt-like smooth surface.

## Nylon

Affordable price, wear resistant and moisture absorbing material, washable, elastic, and comfortable to wear.

# CHOOSE YOUR COLOR(S)

Use the grid below to see what color(s) are available  
for your preferred fabric type(s)

# VARIOUS LOGO OPTIONS

Customize your hat with your branding or artwork. Choose from any of the following branding options and get creative with your design.

1. Direct Embroidery
2. Patches
3. Standard Label
4. Printing
5. Specialty Patches

3D EMBROIDERY

2D EMBROIDERY

EMBROIDERED PATCH  
MERROWED EDGE

The classic patch. Embroidered patches are traditional patches with lots of texture but hard to capture the small details.

PRINTED HAT PATCHES

Sublimated/printed patches are best used when your design has many colors, fine details, or shading that needs to be recreated.

PRINTED HAT PATCHES

Woven patches are perfect for detailed designs that aren't able to be embroidered clearly.

## WOVEN LABELS

Our woven labels are professional, durable, washable, and soft. Available in damask, taffita, satin, and cotton.

## PATCHES

Leather patches are embossed to capture your design on timeless leather.

## PVC PATCH

Looking for patches with 3D artwork that's water proof and weather-resistant? PVC patches are perfect for situations in which the wearer is likely to spend a lot of time outdoors, or on the water

## SUBLIMATION PRINT AND PRINTED CAPS

Sublimation front panel

Adding heat and pressure to sublimated ink will transfer your design to the product for a non-fade, vibrant image. sublimation visor sublimation mesh back panels sublimation logo patch
